## Barr's "Gold Medal" Daffodils

**AWARDED** 

# Forty-four Gold Medals, Three Challenge Cups, AND THE R.H.S. STANDARD CUP FOR NEW SEEDLINGS 1915 & 1916.

Also many First-class Certificates and other high awards.

### CULTURE AND ADAPTATION OF THE DAFFODIL OUTDOORS.

**Soil and its Treatment.**—The Daffodil will thrive in any ordinary garden soil, but prefers a deep, rather moist sandy loam. When the soil is of a dry and sandy nature, it should be deeply dug, if possible a season previous to planting the bulbs, well-decayed eow manure being added, and a vegetable or annual erop grown on the ground. Before the bulbs are planted a sprinkling of quick-lime should be spread on the surface and dug in. If it is not convenient to first take off a crop of Vegetables or Annuals, then, in digging, mix with the soil crushed bones at the rate of  $1\frac{1}{2}$  oz. to the square yard. The ammoniacal properties of stable manure are injurious to the Daffodil; if used, therefore, it should be placed well below the bulb. On good retentive loamy soils a dressing of lime may be given every three years, with an annual dressing of Basic Slag, at the rate of  $7\frac{1}{2}$  oz. to the square yard.

FRESHLY DUG SOIL should be allowed to stand vacant two to three weeks before planting, to allow the ground to settle down, otherwise the freshly planted bulbs are sometimes drawn under considerably below their proper depth, and the bloom in consequence is apt to be weakened and retarded the first season.

The Best and Safest Manures to use are Crushed Bones, Dissolved Bones, Basic Slag, or Phytobroma applied at planting time, and mixed with the soil; the Crushed or Dissolved Bones at the rate of 6 ewt. to the aere, or 2 oz. to the square yard, and Basic Slag at the rate of 1 ton to the aere, or  $7\frac{1}{2}$  oz. to the square yard. We recommend for light soils Crushed Bones in preference to Basic Slag. On very poor and DRY SANDY SOILS we recommend in addition SULPHATE OF POTASH, to be sprinkled annually in the autumn over the surface of the ground, after planting, at the rate of 2 ewt. to the aere, or about  $\frac{3}{4}$  oz. to the square yard. The potash not only increases the depth of colour in the flowers, but also helps to hold moisture in the soil, an essential condition to the perfect development of the Daffodil. In the case of bulbs which have not been lifted we recommend a top dressing (well hood in) of Phytobroma or Dissolved Bones in November and again in January or early February, at the rate of 3 oz. to the square yard. Price List of Manures will be found on page 32.

IN EARLY SPRING, as soon as the Daffodils begin to show above ground, the surface soil should be well broken with a hoe, to sweeten it after the heavy winter rains; a handy tool for this purpose will be found offered on page 31. Where practicable it is advisable to cover the ground in November with some light covering material, such as peat-fibre, pulled heather, cut furze, or gorse, or even old pea sticks laid across the ground; stable manure is not a good mulch for Daffodils. The primary object of a mulch is to prevent the autumn rains hardening the crust of the ground and to break the severity of a sudden frost.

Planting and Lifting.—The best time to plant, to obtain the finest flowers, is early Autumn (as early as possible), although bulbs may be put in as late as Christmas with fairly satisfactory results; we have planted some Daffodils as late as the second week in February, and had some very good blooms in May. We recommend, however, early planting for best results. The bulbs may be left undisturbed for years in ordinary good loamy soils, but on poor or light soils they are better lifted every two years, as soon as the foliage has died down, replanting the best bulbs either immediately or as early as eonvenient. Never plant when the ground is wet and sticky. Do not put silver sand around the bulbs of Nareissi except in the ease of the Bulboeodium varieties.

DEPTH TO PLANT.—The average depth to plant is from 2 to 3 inches, that is to say, a covering of 2 to 3 inches of soil. As the bulbs vary considerably in size, according to the relative varieties, the best rule to go by is the bulb itself, which should be covered with soil once and a half its own depth, measuring the bulb from the collar of its neck to its actual base. On light sandy soils the bulbs may be planted a trifle deeper than on heavy stiff soils, and in the North of England and in cold localities they should be put in a little deeper than in the warmer southern districts.

### Culture and Adaptation of the Daffodil Outdoors—continued.

Grouping for Effect.—To obtain the best effect, Dassodils should be planted in large groups of irregular outline, each group or clump to contain one variety only; avoid straight lines, circles, and symmetrical designs. Masses of Dassodils should always appear in the Hardy Flower border, where irregular and effective sweeps can be planted between the clumps of herbaceous plants which in their turn grow up and hide as well as shelter the Dassodil foliage while it is going to rest. In grouping Dassodils the season of flowering should be borne in mind, as the varieties bloom in succession from the end of February to the end of May, during which period, by a judicious selection, a constant succession of flowers can be maintained. On tage 10 we denote the rotation of blooming.

Naturalising Daffodils in Grass, Etc.—All Daffodils may be planted in grass with perfect success. To produce the hest effect, the three groups should be kept separate: thus the Star Narcissi should not be mixed with the Great Trumpets, nor Poet's Narcissi with the Star Narcissi. In planting, make the breaks large and bold, scattering the bulbs over the ground broadcast with the hand, and planting them where they fall. Daffodils never look more beautiful than when growing on grassy slopes or banks, and we strongly recommend our customers to avail themselves of such situations for naturalising Daffodils. In planting under trees, avoid places where the drip from the branches is greatest, also where the main roots of the trees come close to the surface.

Method of Planting Daffodils in Grass.—We recommend for this work our Special Bulb Planter (see page 31). By the use of this implement the trouble of planting bulbs in grass is reduced to a minimum. It takes out a clean, circular piece of turf 2 to  $2\frac{1}{2}$  inches in diameter, and of sufficient depth. On making the second hole this piece of turf is released from the planter and lies ready on the ground to cover the bulb with. The soil is not in any way tightly pressed and made hard, which is the case when an ordinary dibber is used, and the appearance of the grass is not spoilt; in fact, after planting 10,000 bulbs with this tool on a greensward, one could hardly detect that the grass had been touched. If the ground is poor, a compost of fresh soil with an abundance of Crushed Bones (7 lbs. to a bushel) or Phytobroma (3 lbs. to bushel) should be made and a little of the compost dropped into each hole before placing in the bulb, a little more should be given as a covering, and then the sod of turf be replaced and pressed down. The bulbs will then be given a fair start in their new quarters.

The Best Time for Planting in Grass is with the advent of the antumn rains, when the ground is in a fairly moist condition.

### CUTTING DAFFODILS FOR HOUSE DECORATION AND EXHIBITION.

To obtain very fine blooms Daffodils should be cut in a young state, just when the bud is bursting, placed in water and allowed to expand in a greenhouse or sitting-room. The blooms opened in this way are larger and finer in texture and purer in colour than those which develop out of doors.

### CULTURE OF DAFFODILS IN POTS OR BOXES.

TIME OF POTTING.—Pot as early in autumn as possible to obtain the finest results and earliest blooms. THE BEST COMPOST to pot Daffodils in is a mixture of two-thirds good fibrous loam, and one-third old decayed leaf soil, with a sprinkling of sharp silver sand, adding 1½ lbs. of bone meal or 1 lb. Phytobroma (see page 32) to every hushel of soil, which mix well together before using. In all cases the soil used should be fresh and sweet; never pot in soil that is wet or sticky. In order to destroy all injurious insect life it is a good plan to sterilise potting soil before adding the Phytobroma or bonemeal; we recommend for this purpose the Kondine Soil Steriliser, price 40/- (full particulars on application), or small quantities of soil can be sterilised in a sack by pouring over it a large kettle of boiling water and then spreading out the soil to dry.

THE POTS should be carefully washed and allowed to dry before using; new pots should be well soaked. Never pot in dirty or wet pots.

GOOD DRAINAGE should be secured by placing three or more pieces of charcoal (in preference to broken crocks) over the drainage hole, covering the charcoal or crocks with a little rough fibre from the loam. When boxes are used, the slit at bottom of hox should be covered with pieces of charcoal, a good layer of rough fibrous loam or leaf soil placed at bottom of box to ensure perfect drainage.

COVERING THE BULBS.—The larger bulbs need not be quite covered with soil, the level of which should be half an inch below the rim of the pot to allow of watering when the bulbs are in growth. Bulbs of the miniature species should be covered with half an inch of soil.

AFTER POTTING, stand the pots or boxes outside in the open, on a firm hottom such as a bed of ashes or a gravel path to prevent the entrance of worms. They should then be surrounded and completely covered with Peat-fibre, or old decayed leaf soil (ashes are daugerous, as being often very poisonous), the top of the pots heing 2 inches below the surface of the covering material. This will secure a natural and moist condition to the bulbs and encourage root action. So long as the pots remain huried they will require no watering.

### Culture of Daffodils in Pots or Boxes-continued.

THE POTS SHOULD REMAIN PLUNGED for a period of not less than twelve weeks, after which first-early sorts (marked 1 in catalogue), such as EXCELSIOR, GOLDEN SPUR. HENRY IRVING, KING ALFRED, OBVALLARIS, etc., may be transferred to a greenhouse where the night temperature does not exceed 55° and that of the day 60°. A higher temperature should not be given if well-developed blooms are expected. If the pots are taken into a sitting-room they should be kept during the day in a sunny window and at all times protected from craughts and gas heat. Later-flowering Daffodils (marked in catalogue 2, 3, and 4) should be brought into warmth later and in succession, thus sorts marked 4 should not be removed from the plunging bed until February of March. No Daffodils will bear hard forcing or bottom heat. After the bulbs are out of the plunging bed, give the plants as much light and air as possible, and once a week a very little weak liquid manure water until they come into bloom.

Of the stronger growing sorts use three bulbs for a  $4\frac{1}{2}$  to 6 inch pot; of the miniature kinds, such as Minimus, Nanus, Minor, Cyclamineus, Triandrus, Juncifolius, and Bulbocodiums, use twelve to eighteen bulbs for a  $4\frac{1}{2}$  to 6 inch pot. These small-flowered dwarf-growing species are most charming in pots or little shallow pans. The following may be had in bloom in January:—Minimus, Minor, Nanus, and Cyclamineus, and these may be mingled with Scilla sibirica and Chionodoxas, as both bloom at the same period and produce a charming contrast. For pot-culture the largest bulbs only of Minimus, Cyclamineus, Triandrus, and Corbularias should be used, as being collected when in bloom there is an uncertainty in their flowering the first season. The White Hoop Petticoat Narcissus should be potted in almost pure sand kept well moist, and if placed at once in a cold frame after potting may be had in bloom by Christmas.

If Daffodils are wanted in quantity for cutting early in the season, plant thickly in boxes, giving same culture as recommended above for growing in pots. See varieties for early forcing, page 4.

Narcissus Poetaz Elvira growing in Barr's Fertilised Fibre in a bowl.

## CULTURE OF DAFFODILS IN BOWLS In Barr's New Peat-fibre Mixture.

A charming effect can be obtained by growing Daffodils in fancy vases or bowls, with or without drainage holes, by using our Peat-fibre Mixture, which is light, clean, and nice to handle, and remains sweet; it is preferable to soil where Daffodils and other bulbs are grown in bowls and vases.

Culture.—Fill the vase or bowl with the Fibre Mixture up to within a little below the rim, and plant the bulbs in the same manner as with ordinary potting soil, just covering them; the mixture may be shaken down into place after planting and lightly watered, but should not be pressed down tightly, or the bulbs will be forced upwards when root growth commences.

After planting, either of the following plans may be adopted: -

(a) The bowls or vases may be placed outdoors and covered entirely with Peat-fibre, leaving them thus for 10 to 12 weeks, when the bulbs will have made some top growth.

(b) Or the bowls may be plunged in a cold frame, airy cellar, or out-house instead of outdoors; with this treatment, however, it will be necessary to occasionally give water.

(c) A third plan is to place the bowls after potting in a dark or moderately dark airy place, cool but not too cold; they must not be placed in a close cupboard or the bulbs will certainly suffer.

In the case of bowls plunged outdoors there will be no need to give any attention in the way of watering, etc., as they will, of course, have abundance of moisture from the autumn rains.

Where, however, the bulbs are not exposed to the rain, the bowls should be examined once or twice a week, care being taken that the fibre mixture is kept uniformly damp; but for the first week or two after planting water should be given very sparingly, sufficient only to keep the fibre damp enough to encourage root action. As soon as the bulbs are well rooted, water should be given more freely, the fibre mixture being then kept quite moist; if the mixture is allowed at any time to become dry, even for a day, the buds will go blind; should by any chance too much water have been given, the bowls may be drained by carefully tipping them on their side. If obtainable rain water is the best to use.

When the bulbs have made some top growth the bowls should be removed to the sunny window of a sitting room, where they will get the morning sun, or be kept in a cool greenhouse close to the glass, it being necessary that they should be given sufficient light and air to prevent the foliage from becoming drawn. Draughts and gas heat must be carefully avoided.

No bottom heat should be given, and a temperature of 55° to 60° by day and 50° to 55° by night is sufficient to obtain good blooms; the bulbs resent too warm a temperature.

Collections of Daffodils for Bowl Culture, page 4. Bowls and Peat-fibre Mixture, page 32.

### COLLECTIONS OF DAFFODILS

FOR FLOWER BORDERS AND POT CULTURE.

### Barr's 21/= Collection of Daffodils for Flower Borders.

The following varieties are all beautiful in the flower border, and the selection embracing early and late varieties gives a good succession of bloom. They are all suitable for pot-culture and will give an equally fine display in the greenhouse or sitting-room.

ALL STRONGEST SELECTED BULBS.

3 Bulbs each of the above 26 varieties for 10/6

### Barr's 42/= Collection of Daffodils for Pot Culture.

For Special Cultural Directions see pages 2 and 3.

The following Daffodils can be specially recommended for pot culture, and by gentle forcing a succession of bloom may be had through February and March, the selection containing early and later flowering varieties. If after flowering they are turned out of pots and carefully planted out (the ground being well watered previously, should it be dry) they will mostly flower well outdoors the following season.

Single Trumpet Daffodils, Mixed, for naturalisation .....per 1000, 50/-; per 100, 5/6

White Poet's Narcissi, in Mixture, comprising varieties of early and late Poeticus, for naturalisation in grass, etc. For cutting, the flowers are greatly prized ...per 1000, 35/-; per 100, 4/-

### Unnamed Seedling Daffodils.

The following New Trumpet and New Poet's Seedling Daffodils can be confidently recommended for the Flower Border; they have not been selected out and named as they resemble too closely other named Seedlings which are in commerce. Many fine varieties will, however, be found amongst them.

New Yellow Trumpet Daffodils, Seedlings of King Alfred, Lord Roberts, Monarch, Cleopatra, etc., per 100, 55/-; per doz. 7/6

New White and Cream Trumpet Daffodils, Seedlings of Peter Barr, Loveliness, Madame de Grauff, Weardale Perfection, etc., per 100, 42/-; per doz. 5/6

New Bicolor Trumpet Daffodils, Scedlings of best Bicolor Trumpets, per 100 42/-; per doz. 5/6 New Poet's Narcissi, Scedlings of best large-flowered Poeticus Narcissi, per 100, 7/6; per doz. 1/3

Mixed Unnamed Seedlings, mostly Short-Cupped Varieties, all very showy and attractive, suitable for the Flower Border or to naturalise, per 1000, 60/-; per 100, 6/6; per doz. 1/-

### Miniature Daffodils for the "Rock Garden."

The following are charming little subjects for rockwork, where their dainty flowers are seen to perfection. They should be left undisturbed for years, and, if happy, will soon establish themselves and afford a lovely picture in early spring. All the Bulbocodiums (except monophyllus) and Cyclamineus like moisture, and should therefore be planted at the foot of the rockery. Bulbocodium monophyllus flourishes in a warm dry sheltered situation, planted in almost pure sand; when coming into bloom give water freely. Triandrus albus (Angel's Tears) and Juncifolius delight in partial shade and a light gritty soil, and should be given a well-drained position. In the case of these Miniature Dafforlis, the ground may be carpeted with close-growing surface-rooting plants, such as Arenaria caspitosa, Thymus serpyllum vars., T. lanuginosus, Herniaria glabra, Mossy Saxifragas, etc.; these plants provide a natural protection for these little bulbs, besides keeping their dainty blooms from being splashed and soiled in rainy weather. We prefer, however, seeing these little gems peeping out of grass, and can supply seed of suitable fine dwarf grasses for sowing in September after planting the bulbs; this sowing will give a fine green carpet by the following spring when the Narcissi bloom.

Full descriptions of the following Miniature Daffodils will be found in body of Catalogue.

## Barr's New Seedling Daffodils

The following list of Daffodils comprises some of the finest novelties, and includes New Seedlings of our own raising and many of the best raised by other hybridists—the Rev. G. H. Engleheart, the late Rev. G. P. Haydon, Mr. E. M. Crosfield, Mr. J. C. Williams, Mr. P. D. Williams, Mrs. Backhouse, Mr. Henry Backhouse, Mr. Cave, Mr. Philip Worsley, and Mr. Dawson. We would specially draw attention to the following grand exhibition kinds: Anchorite, Caedmon, Cæsar, Coral Queen, Dell, Elgiva, Empire, Golden Chief, Jasper, Lewis Carrol, Red Beacon, Ringdove, Royal Lady, Ruby, St. Olaf, Socrates, Timon, and Wildfire—all of great beauty.

In 1910 we purchased from Mr. Charles Dawson (who has given up growing Daffodils) his "Rosemorran" Daffodil Seedlings, containing many beautiful varieties, and at the same time took over his charming Cornish garden for the purpose of raising and rearing new seedlings.

We have been awarded for New Seedlings the Engleheart Challenge Cup by the Royal Horticultural Society as First Prize for Twelve Best Seedling Daffodils not in commerce, the Walter Ware Challenge Cup for the Best New Triandrus Hybrids (Midland Daffodil Society), and the Standard Cup (R. H. S.) for 12 New Seedlings.

The relative qualities as we judge them are indicated by xx, xxx, xxxx, the highes flower being given the most marks. The figures after the names indicate the relative plowering, (1) being earliest, (6) being latest.	peri	uali od	of
Alabaster (Triandrus Hybrid), xxxx, new 1912, a very beautiful chalice-cupped hybrid, flowers snowy white with large elegant cup and broad perianth, tall	L	s. 15	d
Anchorite (Barrii) (5), xxxx, new 1914, a grand exhibition flower, having broad long snowy white perianth of great substance and large spreading crown of a delicate lemonyellow, prettity frilled at margin and having a dark green eye, a very cool-looking chaste flower, ht. 19 in.	2	2	0
Caedmon (Poeticus) (4), xxxx, new 1914, one of the most striking and beautiful of all the Poet Narcissi, flower very large with broad snowy white perianth of great substance, and a very bold centre broadly rinmed dark red and having a rich green eye. Awarded First-Class Certificate R.H.S. April 21st, 1915, as a show flower, also an Award of Merit Midland Daffodil Society 1915, and First-Class Certificate North of England Hort. Society 1915	2	2	0
Cæsar (Poeticus) (6), xxxx, new 1911, a remarkably fine flower of perfect form, measuring slightly over 3 inches across, with very broad rounded solid white perianth, the petals all of equal size and well imbricated; large lemon-yellow eye edged dark madder-red; flowers erect and borne on long stout stems, ht. 16 in.	I	ĭ	0
Canaliculatus (Tazetta), a dainty little species having narrow erect bluish green foliage and bearing heads of 3 to 4 flowers with white reflexing perianth and globular golden cup, sweetly scented; valuable for rockwork, ht. 6 inper.doz. 5/6	0	0	6
Challenger (Barrii) (5), xxxx, new 1910, a magnificent flower measuring more than 3 in across, of fine form, solid Poetieus-white perianth and much expanded crown measuring about 1 inch across, soft canary with a striking broad margin of brilliant fiery red	6	6	0
<b>Citriona</b> (Incomparabilis) (4), xxx, new 1912, a beautifully formed flower, soft citron-yellow, almost a self, a charming variety, ht. 18 inper doz. 48/-	0	4	6
Coral Queen (Barrii) (4), xxxx, new 1914, a very lovely flower, perianth white, erown well expanded, of a delicate citron colour with broad margin of pale coral-huff, very distinct, ht. 16 in.	0	7	6
Cræsus (Giant Incomparabilis), xxxx, a very fine flower of great substance with large rounded and imbricated pale primrose perianth and a wide expanded crown of deep red.  AWARD OF MERIT BIRMINGHAM, 1911. FIRST-CLASS CERTIFICATE R.H.S. 1912	4	4	0
Dell (Barrii) (5), xxxx, new 1914, a very refined flower with broad rounded white perianth well imbricated, and a bright lemon crinkled cup having a green centre. A first-class exhibition variety, ht. 16 in.	0	7	6

Barr's New Seedling Daffodils-continued.		ach	·d
Dione (Triandrus Hybrid) (4), xxxx, new 1912, a very lovely and refined flower measuring 3½ inches across, snowy white throughout, crown expanded, of beautiful symmetry, prettily fluted, ht. 14 in.	<i>خ</i> 2	s. 2	
Edna (Poeticus) (4), xxx, new 1913, a bright attractive variety, rounded flower of perfect symmetry measuring 2½ inches across, having a broad white perianth and bright yellow eye conspicuously margined deep glowing scarlet, sturdy grower, ht. 18 in per doz. 10/6			0
Elgiva (Barrii) (3), xxxx, new 1914, a very attractive and distinct variety with cream- coloured spoon-shaped perianth and very large spreading crown, deep apricot-orange, prettily fluted, ht. 18 inper doz. 36/-	0	3	6
Empire (Giant Leedsii) (3), xxxx, new 1911, one of the finest of this class, and a very noble and beautiful flower of highest type; perianth white, very large, broad, and imbricated, crown very large, lemon shading to white, slightly expanded at mouth, and exquisitely frilled, foliage broad and blue-grey, ht. 16 in. AWARDED FIRST-CLASS CERTIFICATE BIRMINGHAM, 1907	2	2	0
<b>Ethelburga</b> (Poeticus) (6), xxx, new 1913, a large and beautiful flower measuring 3; inches across, very broad ample snowy white perianth, well imbricated, and a lemon-yellow eye toning down to green, with a very conspicuous deep margin of dark madder-red, ht. 18 in.		-	
per doz. 21/-  Golden Chief (Trumpet Daffodil) (1), xxxx, new 1914, the largest of all yellow  Trumpet Daffodills and a grand exhibition variety; the flowers are of great substance and immense size measuring 4½ inches or more across with a trumpet 2 inches long, having a bold open mouth regularly flanged and measuring 2½ inches across, colour a uniform deep	0	2	0
golden yellow, a vigorous grower, ht. 20 in.  Helios (Giant Incomparabilis) (1), xxxx, new 1912, a large handsome flower of fine form measuring 4 inches across, with broad imbricated soft yellow perianth and a large trumpet-shaped crown with open frilled mouth, very deep golden with a faint coppery tinge, ht. 18 in.  AWARD OF MERIT R.11.S. 1912.	7	7	0
Herod (Trumpet Daffodil) (4), xxx, a very fine flower of good bearing, perianth creamy white, very broad, and lying smooth and flat, trumpet clear yellow, large and elegant, with broad open frilled mouth, ht. 18 in.	3		6
Jasper (Barrii) (4), xxx, a most striking and beautiful flower with a remarkably rich coloured crown, perianth of fine form, very pale primrose, crown large and flat, of a rich fiery red, ht. 15 in.	0	7	
Lewis Carrol (Poeticus) (5), xxxx, new 1911, flower very large and of good bearing, measuring nearly 3½ inches across, with broad, rounded perianth, slightly campanulate, and canary-yellow eye conspicuously edged dark madder-red, ht. 18 in	2	2	0
Madonna (Triandrus' Hybrid), xxxx, new 1912, a remarkably beautiful chalice-cupped hybrid, solid white with large open fluted crown and slightly reflexed perianth, very chaste		10	0
Marie Louise (Barrii) (5), xxxx, new 1911, a very lovely striking flower with white porianth and large fluted globular cup of an intense scarlet throughout, ht. 18 in	I	5	0
Memory (Poeticus) (3), xxx, new 1912, a remarkably pretty variety having very round flowers of perfect form and finish, perianth broad and solid white, eye margined fiery red and having a greenish centre, ht. 18 in.	I	I	0
Mrs. D. V. West (Trumpet Daffodil), xxxx, new 1915, a beautiful Daffodil raised by Mr. D. V. West, of Victoria, Australia; the flower is of clegant form, slightly drooping, and chaste in colour, measuring 4 inches across, with broad white well-imbricated perianth and a long trumpet opening delicate primrose developing to a creamy white with channelled mouth and slightly frilled edge, ht. 18 in.	ħ	10	0
Music (Giant Leedsii), xxxx, new 1915, a very beautiful and distinct flower measuring nearly 4 inches across, with white perianth and a broad open short cup, pure white shading down to ivory and green at centre, ht. 19 in.		10	
Ornament (Barrii) (4), xxx, new 1913, a very showy and beautiful flower with broad soft primrose perianth, crown elegantly fluted and coloured throughout fiery scarlet, colour lasting well, good forcer, ht. 14 in	1	I	6
Paulhan (Barrii) (4), xxx, new 1913, a very charming bright looking flower, measuring 3 inches across, perianth white, crown \(^3\)4 inch across, of a clear lemon colour conspicuously edged fiery orange-red, ht. 12 in.	0	5	6 0

Barr's New Seedling Daffodils-continued.		ach	
Queen of the West (Trumpet Daffodil) (3), xxx, a grand variety, hearing very large flowers of a uniform lemon-yellow with trumpet elegantly recurved and frilled at brim, a tall	2	S	Ci
strong grower. First-Class Certificate R.H.S. and Birmingham	0	8	$\epsilon$
Red Beacon (Barrii) (4), xxxx, new 1910, a lovely flower which immediately attracts			
one by its brilliantly coloured cup; the perianth is ivory-white, broad and of great			
substance, slightly shaded sulphur at base, cup prettily fluted and of the most intense fiery			
orange-red, ht. 15 in. AWARDED FIRST-CLASS CERTIFICATE NORTH OF ENGLAND			
HORTICULTURAL SOCIETY, 1915	0	I 2	6
Ringdove (Poeticus) (6), xxxx, new 1914, the most perfectly formed flower of all the			
Pocticus tribe and very chaste; the perianth is snowy white, very rounded, perfectly smooth,			
and of solid wavy texture, while the centre is heavily margined red. A perfect show flower,			
retaining its form up to the last, ht. 18 in.	15	15	(
Royal Lady (Loodsii) (6), xxx, new 1914, perianth pure white and well imbricated, cup			
soft pale lemon prettily serrated at margin, a tall strong grower and effective border			
varietyper doz. 36/-	0	3	- (
Ruby (Barrii), xxxx, new 1911, flower of medium size and perfect rounded form, with broad			
imbricated perianth and a pretty flat fiery red cop, lit. 18 in. AWARD OF MERIT TRURO, 1912	0	7	(
St. Olaf (Leedsii) (3), xxxx, new 1913, a flower of remarkable beauty, measuring 3\frac{3}{4} inches			
across, with very broad rounded white perianth, well imbricated, and a wide flattened			
crown, prettily fluted, measuring 11/4 inches across, colour cream delicately margined sulphur			
and with sulphur-shaded centre, ht. 20 in. AWARD OF MERIT R.H.S., April 15th, 1913.			
Illustrated in "The Garden," April 26th, 1913, and the "Gardeners' Chronicle," May 17th,			
1913. This scedling likes a fairly moist soil	0	7	1

### Barr's New Peat-fibre, Shell and Charcoal Mixture.

The best medium for growing bulbs in Vases, Bowls, Jardinets, etc., 3/6 per bushel; 1/- per peck.

For Full Cultural Directions, see page 3. For suitable Bowls, see page 32.

## Barr's General List of Daffodils.

For Alphabetical Index, see p. 2 of Cover. New Seedling Varieties, p. 7.

Classification.—In the following pages we have practically adopted the 1910 classification of the R.H S. Narcissus Committee which we hope will be of assistance to exhibitors of Daffodils and to amateurs who desire to make a selection of distinct types. As will be seen, to distinct divisions have been made together with a section (Div. XI.) at the end to take in a few unclassed species and hybrids. With each division we have given its distinguishing character.

Time of Flowering.—The relative period of flowering of the different varieties out of doors we have denoted by means of numbers after the names, (1) being the earliest, (6) being the latest.

Height.—In most cases we give also the heights in inches as recorded at our Nurseries.

Quality of Flower.—Each season we go carefully over our Daffodil collection with a view to recording the quality of each variety. This we indicate by x, xx, xxx, and xxxx, giving the most marks to those we judge to be the finest. We trust this record may be found useful to amateurs in making their selections.

Cultural Marks.—\* The varieties marked thus \* thrive best under the shade of deciduous trees, naturalised in grass in shady nooks, or on grassy slopes facing north.

† indicates those kinds which should be selected where Daffodils are grown in pots or for exhibition; they are, however, in most cases also splendid border varieties.

§ indicates those Daffodils which, besides being fine border plants, make a pretty effect when naturalised in grass; they are all strong growers and free bloomers.

### I.—TRUMPET DAFFODILS. DIVISION

LORD ROBERTS. Example of a Flower in Division I.

DISTINGUISHING CHARACTER.—Trumpet or crown as long as OR LONGER THAN THE PERIANTH SEGMENTS.

### (A) YELLOW AND SULPHUR-COLOURED TRUMPET DAFFODILS.

With Yellow, Lemon or Sulphur-coloured Trumpets, Perianth of same shade or lighter (but not white).

†Alma (1) xxx, a seedling from Maximus, per doz. each, and of same elegant form, colour nearly a self, soft canary-yellow, trumpet very large with bold open mouth, deeply flanged, perianth gracefully twisted, flower measuring to  $4\frac{1}{2}$  in. across; likes a deep moist soil, bl. 22 in. deep moist soil, ht. 22 in. ..... 15 0... 6

†G. H. Curtis (3), xxx, a handsome variety with large flower of fine form having a deep primrose perianth, broad and smooth, and a bold golden-yellow trumpet with expanded brim, ht. 16 in.... 48 o...4 6

Cleopatra (4), xxxx, raised at our Nurseries, a magnificent variety, flower large and of perfect form and colour; very broad yellow imbricated perianth and long bold deep yellow trumpet, ht. 15 in. AWARD OF MERIT R.H.S. AND AT BIRMINGHAM. In April 1915, it was awarded at Birmingham the Second Prize for the Finest Yellow Trumpet Daffoll in the show .....

- ...7 6

§†Cornelia (3), xxx, flower large, of a soft canary-yellow with expanded trumpet and broad smooth perianth, ht. 18 in.; it makes a good pot plant and is a splendid bedder.

AWARD OF MERIT R.H.S., 1905

§†Emperor (3), xx, perianth deep primrose, trumpet rich full yellow; should be largely

†George Philip Haydon (3), xxx, a large and refined flower, perianth primrose, broad and of fine texture, trumpet bold, canary-yellow with large open mouth boldly fluted and flanged, ht. 18 in.	60	05	6
†Glory of Leiden (3), xx, a very bold Giant Trumpet Dassodil, the flowers staring one full in the face, trumpet rich full yellow, perianth pale yellow, sometimes with deeper yellow markings, ht. 14 in. AWARDED FIRST-CLASS CERTIFICATE R.H.S.,  1887	5	0 0	6
†Golden Chief. See New Seedling Daffodils, page 8each £7 75.			
§ Golden Spur (1), xx, native of the Netherlands, perianth large and spreading, trumpet large and distinctly lobed, deep rich self-yellow; an early forcer and a hand-some Daffodil for borders and grass, ht. 18 in	I	4 0	2
,, Extra large bulbs, each giving two or three blooms ,, 12,6	1	90	2
†Hamlet (2), xxx, raised at our Nurserics, a very handsome flower after the style of Emperor, and having a large broad flat primrose perianth and a well-formed bold yellow trumpet, ht. 18 in. See coloured plate in "The Garden," August 19th, 1911	15	O I	6
\$\frac{\text{Henry Irving}}{\text{long}}(1), \times \text{x}, a native of the Netherlands, broad spreading yellow perianth, large yellow trumpet, very handsome, excellent for forcing, also for cultivation in grass or borders, lt. 18 in	I	40	2
§Hoboken (1), an effective bedding Daffodil, flower of medium size, very deep rich self yellow, trumpet deeply flanged, very early, ht. 15 in.	3	6c	4
†King Alfred (1), xxxx, a remarkably handsome Daffodil which we can strongly recommend; flowers of large size, great substance, and refined finish; colour a uniform intense rich golden; trumpet large and of elegant form, with open deeply frilled mouth; very tall vigorous grower and free bloomer; foliage of a handsome bluish shade, ht. 24 in. It forces early and is greatly prized as a cut flower for vases. FIRST-CLASS CERTIFICATE R.H.S., and R.B.S. LONDON, 1899	10	61	0
†Lord Roberts (3), xxxx, a grand Trumpet Daffodil, raised at our Nurseries; flowers of enormous size, golden-yellow, with broad massive perianth and noble trumpet; tall grower and free bloomer, with strong constitution, height 23 in. Awarded First-Class Certificates by the R.H.S., MIDLAND DAFFODIL SOCIETY, CORNWALL DAFFODIL SOCIETY 1901, and DEVON DAFFODIL SOCIETY 1905. See Illustration, page 10		02	2 0
§†Maximus (2), xxx, a very beautiful and graceful flower of a uniform rich deep golden- yellow, perianth elegantly twisted, ht. 18 in.; it is one of the richest coloured yellow Trumpet Daffodils, but is rather a shy bloomer; nevertheless it should have a place in all gardens where it can be given a deep moist soil. It can also be recommended for early forcing in pots		90	0 2
†Michael (3), xxxx, new 1910, one of the most beautiful and refined of Giant Vellow Trumpet Daffodils, flowers of a clear soft yellow, with a broad, slightly campanulate perianth of great substance, trumpet of King Alfred form, of solid texture, plant of fine erect habit, ht. 19 in. See coloured plate in "The Garden," July 30th, 1910, each £1 10s.		<b>—</b>	_
§†Mikado (1), xx, a showy flower, golden-yellow, with graceful twisted perianth, and very large trumpet having wide open mouth, deeply flanged at brim, ht. 16 in.; a rather shy bloomer	•	3	0 3
*Minor, true (1), a most graceful and charming very early-flowering miniature Daffodil of <i>Maximus</i> form, flowers with full yellow perianth gracefully twisted, and the miniature trumpet elegantly flanged at mouth, ht. 6 in.; valuable for edgings and rockwork, now very scarce		<b>–</b>	2 6
Minimus, true (1), the smallest and dwarfest Trumpet Daffodil, flowers rich full yellow; height about 3 inches, flowering outdoors in February; a dainty little gem for edgings, nooks on rockwork, or to naturalise in grass, and for pot culture. It thrives in warm saudy soils. In 1887, during a tour in Spain, the late Mr. Peter Barr found this charming miniature Daffodil growing freely amongst gorse, with a south aspect. For our annual supply we have to defend upon collected bulbs which are taken up while the foliage is green: in consequence there is a possibility that all the bulbs may not bloom the first season, but a proportion will		; o	0 4

YELLOW TRUMPET DAFFODILS—continued			
†Monarch (3), xxxx, raised at our Nurseries, a noble flower, and one of the most refined of all the Giant Golden Trumpets; perianth and trumpet rich full yellow and very large, of perfect form and fine substance, growth strong and sturdy, ht. 20 in	s.		d
*Nanus, true (1), rich full yellow, very dwarf and early, a gcm for edgings and naturalising on grassy banks, etc., ht. 6 in.; now very scarce. Lobularis is generally sold for it, but is very different in many ways (see page 14)			
†*Obvallaris (Tenby Daffodil) (1), xx, this very distinct variety has all the fine qualities that delight a connoisseur, perianth and trumpet full yellow, very early; it is best grown in partial shade, and is a fine variety for naturalising in grass; ht 12 in.			
A good early forcer			
\$\forall Olympia (3), xxx, a good showy variety with bright yellow perianth and a bold deep yellow trumpet of cnormous size, ht. 21 in. AWARD OF MERIT FOR POT CULTURE R.II.S., 1914	30	30	
§†P. R. Barr (4), xx, perianth primrose, trumpet rich full yellow of fine quality and form, sturdy grower and free bloomer, ht. 16 in.; we strongly recommend it for cutting and to plant largely in flower-beds and borders, and in grass, etcper 100, 12/6		90

tVan Waveren's Giant (3), xxx, a giant Trumpet Daffodil, flowers of immense size, perianth primrose and of rather campanulate form, trumpet bright yellow with			
very large open mouth, flanged at brim, ht. 18 in.	30	02	9

### (B) WHITE TRUMPET DAFFODILS.

Varieties with White Perianth and White or nearly White Trumpet.

Most of the Daffodils in this section thrive best in fibrous virgin loam, mixed with welldecayed leaf-soil; generally speaking they dislike manure; where, however, the soil is very poor, bone-meal or basic slag may be used (for full directions, see page 2). The varieties marked thus \* thrive best in the shade of deciduous trees, naturalised in shady grassy nooks, or on grassy slopes facing north.

LADY AUDREY.

perianth, gracefully drooping over the primrose trumpet; appropriately ealled the "Swan's Neck Daffodil," ht. 16 in	I	90	2

INCOMPARABILIS LUCIFER.

### DIV. II.—INCOMPARABILIS.

### Large Chalice-Cupped Daffodils or Star Narcissi.

DISTINGUISHING CHARACTER .- CUP OR CROWN MEASURING FROM ONE THIRD TO NEARLY THE LENGTH OF THE PERIANTH SEGMENTS.

The varieties of Narcissus Bernardi and Nelsoni, also the larger-flowered varieties of Engleheartii, are now placed under this division.

These beautiful Star Narcissi commence flowering in March, and furnish a succession of bloom throughout April. All are of elegant beauty, and as cut flowers are extensively used for furnishing vases and table bouquets. For this purpose they should be grown in quantity in boxes and foreed for early bloom (see page 2). They make charming pot plants, while in beds and borders they are very showy and naturalised in grass they produce a graceful effect. We illustrate Lucifer as an example of a flower in this Division.

SAutocrat (3), xx, broad full yellow perianth, cup yellow, much expanded, a showy s. d. s. d. flower and free grower, ht. 20 in. ......pcr 100, 8/6 1 3... -

decorative Nower	27	62	6

BARRII SEAGULL, Example of a Flower in Division III.

### DIVISION III.—BARRII.

Short-Cupped Daffodils, or Star Narcissi. (Including those hitherto classed as Burbidgei.)

DISTINGUISHING CHARACTER.—Cup or crown measuring Less than one-third the length of the perianth segments (not including Poeticus, which forms a class by itself).

For a long time trouble was being experienced in the placing of certain new seedlings under the Barrii and Burbidgei sections, as the two divisions ran so much into one another. The revising committee therefore decided to make only one section of them, retaining the name Barrii.

The chaste beauty of these shorter-cupped Narcissi is the more highly appreciated when the cut flowers are seen arranged in vases. The brilliancy of colouring in the cups of some, and the dainty elegance of others, render them all more or less valuable exhibition flowers. The cheaper kinds we can strongly recommend for beds and borders, and for naturalising in grass, woodlands, wild gardens, etc.

LEEDSH ARIADNE. Example of a Flower in Div. II

### DIVISION IV.—LEEDSIL

## Eucharis-flowered or Silver-White Fragrant Star Narcissi.

Comprising all the Star Narcissi (large chalicecupped and short-cupped) which have pure white or silvery white perianth segments and cup or crown white, cream, buff-orange, apricot or pale citron.

In the working out of the new classification, the revising committee felt that it would be unwise to break up this section and distribute it among the Incomparabilis and Barrii forms, seeing how distinct a "colour" section it was, and how well known to all Daffodil growers.

These chaste and beautiful Daffodils are highly prized for indoor decoration, while to cut for bouquets their fragrant flowers are greatly in demand. Plant 3 or 5 bulbs in a 5-inch pot. In flower beds and borders they are most charming, while naturalised in grass they produce a lovely effect.

Example of a Flower in Div. IV. naturalised in grass they produce a lovely effect.			
§*Aglaia (6), xxx, new 1912, an elegant flower, perianth white, cup pale primrose with	per o	d. s.	d d
sulphur centre, margin fluted, very late bloomer, ht. 19 in	36	03	6
§†Albertina (6), xxx, new 1914, an elegant flower with pure white perianth and short			
fluted cup of a delicate primrose, ht. 20 in.	21	02	0
<b>§Amabilis</b> (3), xx, silvery white with long cup, sometimes tinged apricot, a very elegant			
flower, ht. 13 inper 100, 8/6	1	30	2

ht. 18 in	.2	6

TRIANDRUS ALBUS ON ROCKWORK.

## DIV. V.—TRIANDRUS AND TRIANDRUS HYBRIDS.

Under this division are placed Triandrus varieties and all hybrids obviously containing Triandrus blood, such as Queen of Spain (a wild Triandrus Hybrid), Agnes Harvey, J. T. Bennett-Poë, Madonna, etc.

The introduction of Triandrus blood in hybridising has resulted in such a very distinct group of hybrids that the Classification Committee of the R.H.S. deemed it advisable to make one section of them. For grace and beauty they are unsurpassed. We recommend them being given a situation partly shaded by trees, and if a little very fine dwarf grass seed is sown amongst them, the beauty of their flowers is enhanced. Once planted they may remain undisturbed for years.

### NARCISSUS TRIANDRUS.

The Cyclamen-flowered Daffodils with reflexing perlanth.

THE DAINTY LITTLE "ANGEL'S TEARS" DAFFODIL (Triandrus albus) was found by the late Mr. Peter Barr on the mountains of Portugal and Spain, growing in very hard, firm, fine gritty soil, sometimes in the narrowest fissures of granite and slatestone rocks. All in this section make lovely little pot plants (three or more bulbs in a pot), and grown thus should be given cold frame culture. Established on rockwork they form a picture full of grace and beauty. They prefer shade, a gritty soil, and a well-drained

† <b>Triandrus albus</b> (3), an exquisitely heautiful little species, appropriately called the "Angel's Tears" Daffodil, of slender growth, and produces a cluster of elegant		doz, ea	
little creamy white flowers with globular cup and perianth reflexing as in the Cyclamen, ht. 7 in. As we have to depend upon collected bulbs for our annual supply, and these have to be taken up while the foliage is still green, a proportion may possibly not bloom the first season. The bulbs should therefore be left undisturbed to establish themselves			
per 1000, 70/-; per 100, 7/6	I	3	
,, ,, Larger-size bulbs ,, 12/6	-1	90	2
† <b>Triandrus calathinus</b> (3). One of the most beautiful little Daffodils in existence. The flowers, which are produced in drooping clusters of two or three, are snowy white, and more than twice the size of <i>Triandrus albus</i> , with long goblet-shaped crown prettily fluted; the foliage has a curious habit of curling over, ht. 7 in. For pot culture and rockwork it is a perfect gem. The late Mr. Peter Barr collected this rare Daffodil some years ago on one of the Glénan Isles, the collecting being attended with a good deal of risk. Unfortunately it is no longer to be found there, the sea having washed away all trace of it, but we have been able to successfully raise it from seed			
† <b>Triandrus concolor</b> (true) (3), bearing clusters of dainty fragrant flowers of similar form to <i>Triandrus albus</i> , but of a uniform full soft yellow, a rare and beautiful	·		
little Daffodil, ht. 7 in.	15	10	6
† <b>Triandrus pulchellus</b> (4), producing elegant clusters of flowers like <i>Triandrus concolor</i> , but the perianth is primrose and the cup white, a very scarce and beautiful little			

### NARCISSUS TRIANDRUS HYBRIDS.

Of these QUEEN OF SPAIN is a natural hybrid of Triandrus albus and a wild trumpet Daffodil. The other varieties have all been produced by using Triandrus albus or calathinus pollen on trumpet and other Daffodils. They form a distinct class, having flowers more or less drooping, of elegant form and graceful habit, clearly showing their Triandrus parentage.

NARCISSUS QUEEN OF SPAIN.

§†Queen of Spain (3), xxx, found by the late Mr. Peter per doz. each Barr in Spain. One of the most beautiful, distinct, and s. d. graceful Daffodils in cultivation, and unsurpassed either for bedding, pot or vase culture, or for naturalising in woodlands, etc. The flowers vary slightly in size, but all are of a uniform soft, delicate, clear yellow, with a gracefully reflexing perianth, trumpet of distinct and elegant form, ht. 12 in. Naturalised in grass under trees, this Daffodil forms a delightful feature in the garden. It also adapts itself readily to bowl culture in the Peat-fibre mixture, and grown thus affords an artistic decoration for the sitting-room. 1st size bulbs ......per 100, 25/-

Good 2nd size flowering bulbs for large plantings, to naturalise ..... per 100, 18/6 8...0 A few extra large bulbs ..... ,, 35/-5 0...0 6

†Agnes Harvey (4), xxx, a beautiful chalice-cupped hybrid, perianth snow-white, cup of exquisite form, pure white sometimes flushed soft apricot, one to three blooms on a stem, slightly drooping, very beautiful, ht. 13 in.

### DIVISION VI.—CYCLAMINEUS.

Cyclamineus (1), the Yellow Cyclamen-flowered Daffodil.

NARCISSUS CYCLAMINEUS ESTABLISHED ON ROCKWORK

This beautiful little Daffodil was re-introduced into cultivation in 1887 by A. W. Tait, Esq., of Oporto, after being lost sight of for 200 to 300 years. It is the earliest of all Daffodils and is a charming elegant little flower of very distinct form; the trumpet is rich yellow, straight and tube-like, elegantly scrrated at mouth, while the perianth is reflexed as in a Cyclamen. A valuable little species for pot-culture, edgings, rockwork, and to naturalise in grass and shady nooks, or at the water's edge; it delights in a dampish sandy peat soil, ht. 6 in., FIRST-CLASS CERTIFCATE R.H.S. As we have to depend for our annual supply upon collected bulbs, and these have to be taken up while the foliage is still green, they are not all likely to bloom the first season, but a fair proportion will

per 100, 25/- 3 6...0 4 Extra strong bulbs 4 6...0 5

### DIV. VII.—JONQUILLA AND JONQUIL HYBRIDS.

Under this division are placed the Single Jonquil and all Daffodil hybrids where the characteristics of the Jonquil parent dominate, such as Odorus, etc. per doz. each. †JONQUILLA (The Single Sweet Jonquil) (5), xxx, of light elegant growth, bearing out of doors in May charming clusters of numerous small rich yellow flowers of delicious scent, much prized for cutting, ht. 13 in. It produces a pleasing effect when grown in pots or bowls, and may be brought into bloom early by forcing per 1000, 35/-; per 100. 4/- 0 7... -Extra large bulbs ,, 5/6 o 10... --†Buttercup (4), xxxx, a cross between *Emperor* and *Jonquilla*, flower of very distinct handsome form, borne on a long stem; colour rich Buttercup-yellow, almost a self, with broad stiff perianth very slightly reflexing and of same length as the trumpet, which is straight and of great substance; the flower has a delicate Jonquil perfume, ht. 21 in. decorationper 1co, 9/6	I	40	2

### NARCISSUS POETAZ-NEW HYBRID POLYANTHUS NARCISSI.

New hybrids of Poeticus Ornatus × Best Forms of Polyanthus Narcissi.

A fine new race of Daffodils, resulting from a cross between *Poëticus ornatus* and the finest varieties of *Polyanthus* or *Bunch-flowered Narcissi*, the Poëticus being the seedbearing parent. The plants are tall and vigorous growers, bearing heads of large well-formed flowers, deliciously fragrant; they are much finer and more showy than the old Polyanthus Narcissi, and have the advantage of being much hardier. In pots or the flower border they are very decorative, while the flowers are highly prized for cutting.

s†Admiration (3), xxx, new 1914, the showises described as and very decorative either for pots or border; it produces a head of large well-formed flowers, primrose with flattish bright red-orange cup, delicately scented, ht. 18 in. AWARD OF MERIT FOR GARDEN DECORATION R.H.S. 1914 ..... 12 6...1 3

§†Aspasia (3), xxx, producing four to five large bold flowers on a stem, with broad solid white perianth and golden cup, very prettily fluted,

MERIT R.H.S.	3	60	4

### DIVISION IX.—POETICUS—True Poet's Narcissi.

These "Poet's" Daffodils or Narcissl all have snowy white perianth segments or petals, and a small flattened eye or crown, yellow or lemon edged more or less deeply with scarlet or crimson, and sometimes almost all scarlet. All are more or less sweetly scented.

The earlier flowering varieties afford a very beautiful decoration indoors when grown in pots (5 bulbs in a pot) or forced. As border plants and naturalised in grass by themselves the Poet's Narcissi produce a lovely effect.

Early planting and liberal culture is specially recommended for these Poet's Daffodils. To obtain tall stems and fine large flowers they should be grown in a rich deep soil not too dry. The varieties having very highly coloured crowns should be cut young to preserve the fine colouring.

\$†Almira (syn King Edward VII.) (5), xx, a s. d. s. d large-flowered variety with broad round white perianth of good substance, eye margined deep red, ht. 15 in. per 100, 25/- 3 6...0 4 iCaedmon. See New Seedling Daffodils,

DIVISION X.—DOUBLE VARIETIES.
(A) DOUBLE TRUMPET DAFFODILS.
All the Double Trumpet Daffodils thrive admirably when planted in grassland and allowed to remain
undisturbed. They are seen to great advantage when planted in clumps in permanent borders, and as pot-plants they are very attractive (several bulbs in a pot).
†*Capax Pienus (syn. Eystettensis), Queen Anne's Double Daffodil (1), xxx, s. d. s. a native of Ireland, beautiful soft pale lemon-coloured flowers, consisting of six rows of
petals, symmetrically arranged over each other in the form of a star, ht. 7 in
*Gernuus Plenus (The Old Double White Trumpet Daffodii) (1), xxxx, native of England, flowers of exquisite beauty, lit. 10 in. This charming variety likes a
sheltered position and thrives best in the mild climate of the south and south-west of
England, and Ireland, in a well-drained gravelly loam. On no account should it be planted on manured ground. When once planted it should be left undisturbed 30 02 9

### BARR'S SPECIAL SEED FOR GRASS PATHS AND BORDERS.

A charming feature in well-laid-out Spring gardens are close velvety grass walks. They are soft to walk upon, restful to the eye, and provide a delightful contrast to the colours in the flower border. Broad bands of green grass separating the gravel path from the flower border are a great improvement to a garden. Sow in September, per lb. 2/3; 10 lb. for 21/6.

Barr's Lawn Grasses for September Sowing.—Lawns should be renovated in September, after the wear and tear of Summer. Special Lawn Grass circular, with prices and full particulars, post free.

### USEFUL TOOLS FOR BULB PLANTING, ETC.

Barr's Special Bulb Planter (Regd. 548091), specially designed for planting Daffodils and other bulbs in grass. This tool cuts and lifts a clean circular piece of turf which is released from the cup when the second hole is made, and lies ready at hand to fill in the holes when the bulbs have been

put in, it being only necessary to remove a little of the soil from the bottom of the sod. A time must be chosen for planting when the ground has become softened after early autumn rains and not when in a hard and baked condition, as it is then impossible to use this or indeed any other tool with success. By the use of BARR's SPECIAL BULB PLANTER a large quantity of bulbs may

be planted in a very short time, and without the least disturbance of the sward. The length of the tool is 38 inches over all, weight about 3½ lbs. The cup is manufactured from high-class hardened steel and always carries a keen cutting edge.

Supplied in 3 sizes of cup:—To cut out a circular hole 2, 21, or 21 inches diameter, each 12/6. We shall send the medium size  $(2\frac{1}{4}$  in.) if no instructions to the contrary are given.

Barr's Special Bulb Dibber, specially designed for dibbling bulbs into borders, etc.; steel shod, with strong iron tread and cross wooden handle; a good strong heavy tool, weight about 63 lbs., length 36 inches over all. 10/6 each.

Barr's Special Bulb Trowel, made of best steel, specially designed for lifting and planting bulbs, etc. It will be found of great value for general garden purposes, and far in advance of the old-fashioned trowel. 2/9 each.

Garden Trowel, ordinary pattern, solid east steel, all bright, very finest quality, 5 in., 1/6; 6 in., 1/9; 7 in., 2/- each

Hand Fork, (Saynor) of finest quality, solid steel, with three 41-inch solid flat prongs and 5-inch handle; a very superior tool. 2/- each.

12 in. handle, 2/6.

New Pattern Daffodil Hoe, a very useful tool for breaking the surface soil in the Flower Border during dry weather, and especially in early spring

The Caxton Cultivator (Commended by the R.H.S., 1914), invaluable for breaking surface soil in Spring and Summer, 3-prong, with 4 ft. handle, 3/9 each.

The Cuma Cultivator, similar to The Caxton, but with smaller prongs and a 21-inch handle, 1/6 each.

Hybridising Tweezers, suitable for easily removing pollen from Daffodil flowers, per pair, 2/6. Glass Pollen Tubes, 1/6 per dozen.

### BARR'S SPECIAL METAL LABEL FOR DAFFODILS, Etc.

With raised letters and solid metal shank, about 9 inches long. We specially recommend this for beds and borders. Per doz. 4/ ..

The above price includes the stamping of any name required. These special metal labels are not kept in stock, being made only to order. The time taken to execute an order is generally from 2 to 3 weeks.

### BARR'S PHYTOBROMA FOR BULBS, Etc.

The best Manure for Daffodils, Hyacinths, Tulips, etc., and for Flower Borders generally. It should be mixed with the soil below the bulbs at planting time at the rate of 2 to 3 ozs. to the square yard, and in Spring, when the bulbs are showing above ground, a top-dressing may be given of 3 oz. to the square yard. For Pots, mix Phytobroma with the soil, to be used at the rate of I lb. to the bushel, and in Spring, when growth is showing, top-dress once a fortnight, using a small teaspoonful and well mixing with surface soil.

Nett Prices-2 lb. tin, 1s.; in bags-7 lb., 2s. 6d.; 14 lb., 4s. 6d.; 28 lb., 8s.; 56 lb., 13s. 6d.; 1 cwt. 26s. Prepaid Orders for 28 lb, and upwards sent Carriage Paid to any station in Great Britain or to any port on the Irish Coast.

### MANURES. Soils, FIBRE, VASES & BOWLS FOR DAFFODILS.

Barr's Phytobroma, the best Manure for Daffodils, Hyacinths, Tulips, etc., and for Flower Borders generally. 2 lb. 1/-; 7 lb. 2/6; 14 lb. 4/6; 28 lb. 8/-; 56 lb. 13/6; 1 cwt. 25/-.

Basic Slag, finest quality, per ewt. 12/6; per 56 lb. 6/6; per 28 lb. 3/6; per 14 lb. 2/-.

Bone Meal (Genuine Fine Crushed Bones), best quality, per cwt. 17/6; per 7 lb. 1/3.

Pure Dissolved Bones, best quality, per cwt. 17/6; 7 lb. 1/3.

Sulphate of Potash (now very scarce), per 28 lb. 13/6; per 14 lb. 7/-; per 7 lb. 3/9.

Lime, Fine Ground, for garden use, per bushel, 3/-.

Barr's Mixed Potting Soil, containing a suitable quantity of Phytobroma, 2/6 per bushel.

Barr's New Peat-fibre, Shell, and Charcoal Mixture, ready mixed for use, a specially prepared mixture suitable for growing bulbs in vases, bowls, jardinets, etc. (for cultural directions, etc., see fage 3). 3/6 per bushel; 1/- per peck.

**Peat-fibre,** recommended in preference to Cocoa-Fibre for plunging bowls, pots, ctc., and as a winter mulch to bulb-beds, etc., per bushel, 1/6.

Small Pebbles and Charcoal, 6d. per quart; 3/6 per peck.

Charcoal (fine twig), per peck 1/-; per bushel 3/6.

Bulb Bowls.—We have had special little vases made for us by Messrs. Doulton for growing Daffodils and other spring bulbs in our Peat-Fibre and Charcoal Mixture. They are of elegant shape, of neutral art green and drab shades, and without drainage holes, thus saving the use of saucers; useful for growing not only Daffodils in, but also Tulips, Hyacinths, Crocuses, early Scillas, Snowdrops, Chionodoxas, and Lily of the Valley, also the charming winter-flowering Irises—reticulata, etc., either for table decoration or the greenhouse. During summer these bowls are very useful for holding cut flowers, etc. All Daffodils which may be grown in pots may also be grown in these fancy bowls, and in the foregoing pages we have indicated thus † those kinds most suitable for the purpose.

Doulton Ware, unglazed, neutral drab shade.

 $2\frac{1}{2}$  in. diam., -/9 each. 4 in. ,, 1/3 ,,

 $5\frac{1}{2}$  in diam., 2/- each. 7 in. , 3/- ,,

No. 229.
"Delph," blue and white earthenware.

 $6\frac{1}{2}$  in. diam., 1/3 each.

 $8\frac{1}{2}$  in. ,, 2/6 ,, g in. ,, 3/- ,,

Illustrated List of other Vases and Bowls for Bulb Culture sent on application.

### BOOKS ON THE DAFFODIL.

- Prepaid Orders for Bulbs to value 10s. and upwards sent Carriage Paid to any Railway Station in the United Kingdom.
- 5% Cash Discount on Bulb Orders of 20s. and upwards.—1s. in the £ discount is allowed for Cash with Order (with the exception of the special Collections offered on pages 4 and 5, which are strictly nett), and this may be deducted by the Customer when remitting or if this is not done, a liberal equivalent in goods will be added to the Order. The same discount may also be deducted from all Bulb Accounts of 20s, and upwards when paid within 14 days from date of invoice (excepting Collections offered on pages 4 and 5, which are nett).
- Terms of Credit.—Our books are made up half-yearly, when all accounts are due nett.
- Remittances.—Money Orders and Postal Orders should be made payable at Bedford Street Post Office; these and all Cheques should be crossed "London County and Westminster Bank." Small amounts may be remitted in Postage Stamps, or Coin in a Registered Letter.
- Packages. Boxes, Bags, etc., are charged at cost price, but these may be deducted from our account if returned Carriage Paid within a fortnight. Returned empties should have the sender's name on the address label for identification, and an advice sent by post, stating date of despatch and name of Railway Co.
- Nurseries at Taplow, Bucks.—Visitors are invited during Spring to see our magnificent Collections of Daffodils and Tulips in bloom. The Nurseries are adjoining the main line of the Great Western Railway, and are entered from the Bath Road within quite a short distance of Taplow Cab Rank at Taplow Station.
- Naming Daffodils. Cut specimens of Daffodils we undertake to name correctly, at the charge of 4d. each, 3s. per dozen, to cover attendant expenses. Address all cut specimens to be named, accompanied by a remittance, to our Nurseries, Taplow, Bucks.
- Daffodil Prizes.—We award Silver Cups, Yases and other prizes for Daffodil Competitions in various parts of the British Isles and Colonies. Particulars of Competitions for Spring 1917 will be sent on application.
- Catalogues. Our Seed Guide is published in January, Descriptive Catalogue of Bulbs and Tubers for Winter and Spring Planting in January, Hardy Plant Catalogue 1st of March, Daffodil and General Bulb Catalogues in August. We are always pleased to forward any of these Catalogues, free of charge, to friends of our Customers on receipt of a line requesting us to do so.
- Gardeners.-We keep a special Register of Gardeners in want of situations, and shall be pleased to put such in communication with any of our Customers requiring Head Gardeners.
